OC Neutralizer

WHY WOULD YOU WANT A DECONTAMINANT?

Pepper spray, is designed to be inflammatory, causing irritation to the skin, eyes, and in some cases can induce temporary blindness. Unlike tear gas, which wears off fairly quickly, pepper spray will continue to be discomforting, (depending on skin type) for upwards of 45 minutes to a few hour.

PEPPER SPRAY FACT: No lasting damage happens when someone receives a dose of pepper spray and symptoms usually begin to remedy themselves in about 15 minutes to 45 minutes.

While there is no antidote that is 100% effective, there is the Liquid Bullet Neutralizer to assist in minimising the effects of the Pepper spray and to decontaminate the environments where it has been deployed.

IMPORTANT NOTE: While the natural reaction to being sprayed in the face is to reach quickly to your face, attempting to rid yourself of the pain, try to avoid doing this, as this will further inflame the affected area.

WARNING: If you are sprayed in the eyes and are someone who wears contacts, remove them as soon as possible, then flush the eyes repeatedly with eye wash or saline.

If you're someone who carries pepper spray for potential defensive purposes, it would be wise to carry a decontamination spray in case the spray is used accidentally, or the wind causes some to come in contact with your own skin.
